Research Center &
The Family Issues Network***

invites you to attend a special presentation by

**Dr. Ilene C. Siegler, Ph.D., MPH
Professor of Medical Psychology
Department of Psychiatry and Behavioral Sciences
Duke University**

**“Normal Aging in the 21st Century: Contributions
from Lifespan Developmental Psychology and
Implications for Public Health”**

**Wednesday, November 4th
10 to 11:30 am, Sims 3rd Floor Atrium
Free and Open to the Public Light refreshments served**

Dr. Siegler is a Senior Research Scientist at the University of North Carolina (UNC) at Chapel Hill's Institute on Aging and at the University of Georgia's Gerontology Center. She is Director of the UNC Alumni Heart Study - a prospective epidemiologic study of 5000 individuals who attended UNC in the 1960s and have been followed to understand how they have aged from age 40-60. Dr. Siegler's research interests are in studying the role of personality in understanding health and disease at midlife, developmental psychology and behavioral epidemiology, and racial differences in emotional responses to care giving. She was the recipient in 2007 of the American Psychological Association's prestigious Developmental Health Award in recognition of her research contributions to the fields of health and aging.

**For more information contact: College of Human
Ecology Research Center at (315) 443-9233**

**The Family Issues Network is a group of SU faculty, staff and students interested in teaching, research, service and policy development related to children and families.*
